

2011 Liverpool SC Mersey Tideway

2011 Tideway saw the event as cruise again, with a few old friends amongst the visitors and some new Tideway first timers. A good showing by the GP14's with four GPs and one Enterprise enjoying the energetic beat to New Brighton in the testing F4-5. The Garston Channel lived up to its reputation with a good test of seamanship ,with its tricky entrance past the rocks and good standing waves especially around Nelson wreck.

As a well deserved reward. the almost dead run all the way home was bathed in sunshine, though the gusty and changeable wind kept everyone on there toes to avoid that un-intentional gybe. The day was round-ed off with a very welcome barbecue. back at the club
